Sage Professor of Psychology at Cornell University.

A Primer of Psychology

JUST READY.

Cloth, Crown 8vo, \$1.00 net

This volume is intended as a first book in psychology. It will therefore seek to accomplish the two main ends of a scientific primer of the subject; to outline, with as little of technical detail as is compatible with accuracy of statement, the methods and most important results of modern psychology, and to furnish the reader with references for further study.

An Outline of Psychology

THIRD EDITION.

Cloth, 8vo, \$1.50 net

“As a contribution both able and useful, Professor Titchener’s volume will unquestionably find, as it deserves, a most cordial welcome. In many ways it is the most serviceable text-book of psychology from a modern scientific point of view that has been written, . . . clear, exact in expression, systematic, methodical. The work is thoroughly good and useful.”

JOSEPH JASTROW,

University of Wisconsin, in *The Dial*.

The Social Mind and Education

By **GEORGE VINCENT**

Assistant Professor of Sociology, Chicago University.

Cloth, 16mo, \$1.25.

"Professor VINCENT has produced a distinctly useful book, the value of which is not at all to be measured by its size. He has also made it thoroughly interesting. It is a treatise on education, but education viewed in the light of the comparatively new "social aspect" of things. It shows in a marked degree the present reaction from the narrow individualistic idea of education."—*The Tribune*, Chicago.

DR. FRANCIS WARNER

Author of "The Growth and Means of Training of the Mental Faculty."

"I have read this volume with the very deepest interest. I regard it as one of the very best contributions yet made on the subject of Child Study. The author has treated the subject in a direct and practical manner that is easily comprehended by the average school teacher."

Mental Development of the Child and the Race

VOLUME I. Methods and Processes of Mental
Development.

CLOTH, 8VO, \$2.60 NET.

"This summary sketch can give no idea of the variety of topics which Professor Baldwin handles, or of the originality with which the central thesis is worked out. No psychologist can afford to neglect the book, and its second part will be eagerly expected."—From a Review by PROF. TITCHENER, Cornell University, in *The Dial*.

VOLUME II. Social and Ethical Interpretations in
Mental Development.

NEW BOOKS FROM THE MACMILLAN COMPANY

An Introductory Logic

BY

JAMES EDWIN CREIGHTON

Sage Professor of Logic and Metaphysic in Cornell University

Crown 8vo. Cloth. \$1.10 net

This volume is intended as a text-book for college students, and is the result of the author's experience in teaching logic to undergraduate classes in Cornell University. It aims at being both practical and theoretical. While the doctrine of the syllogism, and the methods of inductive reasoning, are presented as fully as in the older text-books, an attempt has been made to reinterpret these views in the light of modern logical theory. The third part of the work also outlines in an elementary way a theory of thought or knowledge, and thus makes accessible to students the main results of recent investigations. The book is supplied with a set of practical questions and problems.

Guesses at the Riddle of Existence

BY

GOLDWIN SMITH, D.C.L.

Author of "The United States," etc.

A new and cheaper revised edition with new matter, \$1.25

Of these five essays three are of especially philosophical interest:—the first which gives title to the volume and discusses the views of the late Professor Drummond in his *Ascent of Man*, of Mr. Kidd in his *Social Evolution*, and of Mr. Balfour in his *Foundations of Belief*, the third, "Is there Another Life?" and the fifth, "Morality and Theism."

"Nothing is attempted here," says the author in his preface, "beyond the presentation of a plain case for a practical purpose to the ordinary reader." Yet the philosopher cannot fail to be interested in this plain, serious and candid statement of the final conclusions of a brilliant mind, reflecting on the experience of a lifetime, as to the ultimate questions of the universe."—*Philosophical Review*.

Instinct and Reason

BY

HENRY RUTGERS MARSHALL

Author of "Æsthetic Principles," "Pain, Pleasure, and Æsthetics," etc.

This book deals with subjects of almost universal interest which the author treats generally without psychological technicality, placing all necessary psychological discussions in separate chapters. The chapters on Instinct lead to a study of the nature of religion and of the nature of moral codes. In the chapters on Reason the author presents a thesis in reference to the nature of variation and attempts to show that Reason can be expressed in terms of Instinct.
